

Challenge 03

For this week you will also have to make a page for cities. You can see the behavior of the images on the video. The design should look completely the same as it is given on the screenshot.

Scoring:

1 point - the whole HTML & CSS.

3 points - The images should behave like given in the video (parallax effect).

5 points - The images should be lightened with grey color like shown and make it responsive for mobile (max-width: 600px). Below 600px the images should no longer be parallax and the titles of the first and last div should be positioned on the right.
